PROJECTS

Image Steganography

- The Image Steganography Project conceals sensitive data in digital images using advanced algorithms and encryption for secure communication. With a user-friendly interface, it provides efficient and covert data concealment in cybersecurity.

NFT Minting and Market Place

- NFT Minting and Marketplace revolutionize digital ownership. This project enables the creation (minting) and trading of unique digital assets using blockchain technology, fostering a new era of decentralized and authenticated digital ownership.

Professional Summary

- Managed and maintained Kubernetes clusters, ensuring high availability and scalability for containerized applications.
 - Streamlined the CI/CD pipeline using Jenkins for a Java-based applications integrating with Maven, Sonarqube and Sonatype Nexus.
 - Demonstrated proficiency in Terraform, creating infrastructure on AWS using Terraform.
-

CAREER OBEJECTIVE

- To seek a position where I can effectively contribute my skills by applying my knowledge and to synchronize my personal growth
-

HOBBIES

- Playing basketball
- Learning Music
- Hiking
